

Expand Your Practice TODAY Using Botox & DERMAL FILLERS

For over decades, dentists have been treating patients in and around the oral cavity. A paradigm shift in the treatment modalities of patients have brought about a new dimension to venture beyond the usual areas. Dentists have the expertise and knowledge of the face and neck anatomy to include treatment of a non-invasiveness for our patients.

As the demand for non-invasive treatment grows, it's time to incorporate aesthetic solutions into your practice! Meet your patients' needs by giving them a safe and effective alternative to surgery that results in improved, younger look facial skin. Botulinum Toxin has been used over many years for various muscular disorders. The effects have brought about many therapeutics & cosmetic results. As people ages, voids and 'drop down' facial tissues can be augmented using fillers to very satisfactory results.

Make a difference in your clinic and see the improvement in your bottom line!

Dr. Ben C. Ng

B.D.S., Fellow I.C.O.I., Fellow I.T.I., Fellow I.C.D., M I.A.F.A.
